

PURPOSE STATEMENT: *Based on our shared understanding of climate justice and our commitment to build systemic, transformative solutions that address the root causes of climate change, we will craft a coordinated plan of action.*

GOALS OF SMALL GROUP WORK

- Generate Community Visions
- Identify Assets and Opportunities
- Create Action Plan to move towards the vision

PART 1: VISION, ASSETS, & OPPORTUNITIES

1) What is our collective vision for Gulf Coast communities?

(spend time drawing out big ideas: What is our vision for our local communities? What is our vision for the region and beyond? – shift to concrete solutions and/or practices)

2) What do we already have? *(Focus on the question in relation to the small group theme - What relationships do we have? What alliances exist? What knowledge do we have? What resources do we have?)*

3) What are opportunities for strategic advances? *(What are known factors happening over the next few years? What is possible? What can we do together?)*

Part 2: PLAN OF ACTION

4) What are coordinated activities & action steps that will move us toward our visions?
